    <p style="text-align: justify; text-indent: 0.5in;">

        Hello world! My name is Izzuddin Ahmad Afif. I am a
        freshman majoring in Internet Engineering Technology at Electronics
        Engineering Polytechnic Institute of Surabaya. I am very passionate
        about <big><b>Cyber Security</b></big>. For the time being, I am
        learning about HTML and this is my first project using HTML. There is
        one thing I like about this Web Programming Language. Apparently, HTML
        tags are non case-sensitive. So you can use uppercase letter or
```

lowercase at you own will. This suits myself who doesn't really care about writing rules LOL.

<p align="right">I think that's it for now, see you around!</p>

</p>
